NOTEBOOK | PLAN AT A GLANCE

01

SESSION PLAN

- » Review the iLEAP Cycle. Explain that we took our time to really learn iLEAP, so that the steps would become natural and automatic. Throughout the video series, our presenters talked about organizing your learning with a notebook. They talked about page templates that can be used and entered into your notebook. Today, we want to introduce the first notebook tool that helps to work through the iLEAP cycle for a specific goal.
- » Today's video will introduce planning pages that can go right into your notebook – to help you stay organized as you work through the iLEAP cycle. We call these planning pages “Plan at a Glance.” Remind the students that these templates are a guide to help them while they are learning to use the strategies presented in this program. But as time goes by, they may develop their own system of organizing their learning.
- » Ask the students to explain what “glance” means. Having everything available at one “glance” allows you to keep your goals and plans in mind, without having to flip through many pages.
- » Handout blank copies of “Plan at a Glance,” along with Veronika’s completed sample. Have the students look over Veronika’s sample in pairs. Then go over it with the whole class. The students should easily identify the various sections of the iLEAP cycle contained in the document.
- » Have the students watch the video: Notebook - Plan at a Glance
- » Hand out the *transcript*, along with the *see it*, *try it* & *use it* activities. Have the students work through the activities. Feel free to encourage pair work. The activities that aren't completed in the session can be assigned for homework.
